

Can you locate the economic crisis?

**Where did it start? Where is it going?
Where do you see it in your life?**

Use this sheet to map out how you view "the crisis". You could literally locate the sources and effects of current economic problems in space, draw pictures of what crisis means to you, write down what sorts of experiences in your own life connect with the crisis, or anything else you can imagine...

is it in the grocery store?

is it on Wall Street?

is it all around the world?

is it on campus?
(is it in the football stadium?
which seats?)
